Professional Summary

Power Platform Developer with 1+ year of experience designing and maintaining Canvas Apps and automated workflows to support internal business operations. Proficient in Power Apps, Power Automate, and SharePoint, with hands-on experience digitizing manual and paper-based processes into streamlined digital solutions. Adept at optimizing application performance, improving UI/UX responsiveness, and collaborating with business stakeholders to deliver user-centric tools that enhance operational efficiency.

Professional Experience

Far Eastern Polytex Company Nov 2025 – Present
Power Platform Developer *Ho Chi Minh City, Vietnam*

Accounting Contact Request App

- Rebuilt the application from scratch using Power Apps Canvas App, delivering a fully responsive layout across mobile, tablet, and desktop devices
- Redesigned and optimized the entire UI/UX to improve usability and visual consistency for end users across multiple departments
- Implemented a multi-stage approval workflow (Submitter → Manager → Accounting) using Power Automate to digitize and replace manual paper-based request processes
- Resolved SharePoint delegation limitations by restructuring data queries and filtering logic to ensure scalable, server-side data processing beyond the 500-item threshold

Lab Contact Request App (Online Contact Form)

- Rebuilt the application from scratch using Power Apps Canvas App, delivering a fully responsive layout across mobile, tablet, and desktop devices for production departments and the laboratory team
- Implemented dynamic multi-stage approval workflows using Power Automate, supporting two distinct approval paths: a 2-level flow (Submitter → Department Supervisor → Lab) for test frequency requests, and a 3-level flow (Submitter → Department Supervisor → Lab → Senior Manager) for test criteria and shutdown notification requests
- Optimized application code and UI/UX for improved performance, visual consistency, and ease of use for non-technical production staff in a factory environment

Kademia Digital Transformation Company Jun 2025 – Present
Power Platform Developer Intern (Project-based) *Ho Chi Minh City, Vietnam*

- Developed a Recipe Management screen using Power Apps Canvas App, supporting full CRUD operations (create, read, update, delete) with search functionality; each recipe contains multiple raw material entries managed within a single interface
- Designed and executed test cases for application screens, performed functional testing to ensure features met business requirements
- Conducted User Acceptance Testing (UAT) sessions directly with client stakeholders to validate workflows and gather feedback
- Created end-user documentation including step-by-step usage guides tailored for non-technical users
- Studied and analyzed business operations of an inventory and stock management system (SAF) for a dairy manufacturing client

Education

Saigon University (SGU) Sep 2021 – Mar 2026
Bachelor of Engineering in Software Engineering *Ho Chi Minh City, Vietnam*

Technical Skills

Microsoft Power Platform: Power Apps (Canvas Apps, Code Apps), Power Automate (Cloud Flows, Approval Workflows), SharePoint Online, Dataverse, Power Fx
Programming Languages: JavaScript, TypeScript, React, Python, Java, C#
Data & Integration: SharePoint Lists, Dataverse, SQL, REST APIs, Custom Connectors, JSON
UI/UX & Development: Responsive Design (Mobile, Tablet, Desktop), PCF (Power Apps Component Framework – self-studied)
Quality Assurance: Test case design, Functional testing, User Acceptance Testing (UAT), Technical documentation
Core Competencies: Business requirements analysis, Business process automation, Workflow design, Stakeholder communication, User training

Projects

Meeting Room Booking App | *Power Apps Code App, React, TypeScript, SharePoint*

- Self-initiated project built using Power Apps Code App — a pro-code approach that allows developers to build full React/TypeScript applications deployed and managed within the Power Platform ecosystem
- Implemented core features including room booking, calendar view, and an admin management panel for room and schedule configuration
- Integrated Power Automate to trigger automated booking confirmation and notification emails via Outlook
- Used SharePoint as the data layer for storing booking records and room information, connected via Power Platform connectors
